

# NWG Resilience: Cybersecurity Strategy and Execution Made Simple

In today's complex cybersecurity landscape, organizations face an overwhelming array of tools, services and decisions. Without a clear strategy or organizational alignment, it can feel like you're trapped playing an endless game of security "whack-a-mole."

Welcome to NWG Resilience: A subscription service that equips you with a team of experts, working arm-in-arm to improve your cyber resilience. No matter where you are or what your business needs, we deliver proven methodology, planning and execution so you don't have to navigate cybersecurity alone.

## More Than a Virtual CISO

You don't need another framework, collection of tools or individual consultant leaving you with a longer to-do list. NWG Resilience is a comprehensive partnership where strategy comes with hands-on validation and support. We actively work alongside you — whether you have a CISO, vCISO or something else entirely — to improve your security posture, offering long-term integrated service delivery that enhances your overall cyber resilience.

### 5 Key Components of Cyber Resilience

**Anticipation:** Gathering intelligence on potential threats and assessing risk.

**Prevention:** Making successful attacks less likely by implementing security controls and best practices.

**Detection:** Real-time monitoring for threats, anomalies and suspicious activity.

**Containment:** Isolate threats and minimize the impact of incidents.

**Recovery:** Restoring normal operations while incorporating lessons learned.

*Security incidents are inevitable. Disruption to critical operations doesn't have to be.*

## Taking the Guesswork Out of Cybersecurity

Every organization has blind spots. We can help you see the big picture, all while staying ahead of the modern attacks being deployed by today’s threat actors. NWG Resilience connects the dots between your unique business objectives, threat landscape, risk tolerance, regulatory environment and operational dependencies to build a practical cybersecurity strategy.

## Core Service Offerings

- High-quality, full-scope penetration testing
- Persistent testing to validate the effectiveness of your security
- Cyber incident tabletop exercise
- Purple Team functional exercise
- Regular “ask-me-anything” advising sessions with experts
- Crisis management support

### Flexible add-ons, tailored to meet your unique needs:

- Analysis and recommendations of plans, policies and procedures
- Hiring guidance for key leadership roles, including selection, placement and onboarding support
- Technology consulting
- Managed security services
- Executive training and education

## NWG Resilience Delivers

- Comprehensive assessments
- Regular testing and support
- Strategic guidance
- Executive communication and alignment
- Measurement and validation
