

About NWG Secure

NWG Secure is for small to medium sized enterprises that care about security.

Whether you're resource constrained, focused on compliance or just need data to start taking actions, we can help you understand your current security posture and strategically plan for the future.

NWG Secure provides practical strategies to improve cyber resiliency.

Our proprietary methodology is based on more than 25 years of defending customer networks and continuously adopting cutting-edge best practices. Our diverse experience spans different industries, including companies of varying sizes and architectures. And our passion is providing actionable solutions to real-world security challenges.

NWG Secure is intentionally high-level and non-technical.

Our assessment may be deep but our deliverables are presented simplistically to ensure maximum comprehension and adoption.

NWG Secure is an analysis of the ten most important domains in your security program.

NWG Secure Benefits

Executive Summary

You will receive a description of the methodology used to conduct the assessment and other details to contextualize, interpret, and analyze the results.

Maturity Matrix

Based on assessment findings, we will deliver a current-state view of your organization’s security maturity. Each NWG Secure domain is presented with a current maturity rating and its associated security risk, change effort, and impact on personnel.

Summary of Findings

The findings for each domain will be summarized with key observations discovered during the assessment.

Prioritized Recommendations

Developed by NWG's seasoned security experts, this section provides your organization with a roadmap of recommendations that can be implemented to address any gaps in your current security maturity and improve your security posture. The recommendations are prioritized and grouped by short-, medium- and long-term actions, and will include a combination of risk reduction and implementation efforts.

What Customers Love About NWG Secure

- **High Level**
 Analysis is focused on themes, not nuance
- **Practical**
 Actionable insights improve internal communication and alignment
- **Risk Informed**
 Highlight the risks but also share strategies to mitigate them
- **Prioritized**
 A tactical roadmap with a clear order of operations
- **Pragmatic**
 Recommendations that focus resources and investments on things that matter
